January 2009

This Issue

InterGlobal Forest

Newark, NJ Warehouse

Next Issue: CARB Certified Plywood

Quality Hardwood Plywood from Around the World

Since 2001 **Crown Marketing & Associates, LLC** and **InterGlobal Forest (IGF)** have approached the market with a philosophy of "domestic quality products and service at a savings" by sourcing only from quality overseas producers. End users and distributors have grown to trust Crown Marketing and our disciplined approach to providing unparalleled quality and service. As a result, IGF hardwood plywood products have become the standard for cabinet and fixture manufacturers looking for consistent quality in an imported product.

One example of IGF's commitment to the Northeast market is a lease-owned warehouse in the [Port Newark, NJ](#) area. Investing in our own warehouse and staff guarantees convenient pickup services, easy accessibility and gives us more control over your service experience. Other warehouse locations are strategically located throughout the United States.
