

# **3/4" Neatflex™ – the ultimate material for custom curves**

**45% less weight than regular MDF plus all the qualities of birch plywood**

## **Neatflex Benefits**

- Labor saving
- One piece 3/4" frame construction
- Easy to construct frameless curves
- Suitable for heavy duty applications

## **Neatflex Characteristics**

- 3/4" thick
- 96" x 48" sheet – cross cut / cross grain
- S grade birch plywood face on an MDF Lite platform
- Full range of curves from 12" radius
- 51 lbs per sheet – 1.63 lbs per sq.ft.
- Workshop' units of only 20 sheets

*Neatflex has a unique construction that enables it to be quickly formed into strong, smooth custom curved surfaces with less weight than other techniques*

To see a sample or try your first sheet of 3/4" Neatflex contact your local distributor

**Neatflex™ can be combined with itself,  
Neatform® Bendy MDF, plywood or laminate  
to create frameless free-form curves**

Neatflex™ is the speedy and simple way to make  
inspirational curved surfaces

3/4" Neatflex:  
12" minimum radius

3/8" Neatform:  
6"-8" minimum radius

1/4" Neatform:  
4"-6" minimum radius

*In addition  
to frameless  
techniques,  
Neatflex™ can  
be attached to  
a regular  
framework.*
